

AT ANDERSON CONCRETE

*your satisfaction
is our success*

For more than 40 years, we have been working with the local construction industry to build Hong Kong. EarlyCrete™ is another specialty product proudly presented by Anderson Concrete to meet the increasingly stringent construction requirements. With each load of EarlyCrete™, we deliver good quality and top service to ensure your satisfaction. We value your business; therefore we make sure that you get value from your business with us.

We offer comprehensive range of specially formulated products. To meet your specific needs, simply call our experts to discuss and evaluate your project need and we will offer our solutions.

5 GOOD REASONS | choosing **EARLYCRETE™** to your project

On Schedule

Designed to meet your required set time and high early strength that helps you finish job faster

Improves Concrete Quality

High quality, long durability, superior finishing and reducing cracks.

Flexibility to Plan Ahead

Reliable set time and high early strength for pre-planning.

Improves Productivity

Allow finishing the concrete right after placing.

Safer and Trouble Free

Steel plates for protecting concrete or other temporary works are not needed.

REDEFINING Concrete

EARLYCRETE™ *Unique Properties
Uncompromising Performance*

- Airport runway repairs and cargo terminal concrete resurfacing
- Urgent road repairs

In demanding applications such as this, where time is an issue and critical to your project, you can rely on EarlyCrete™

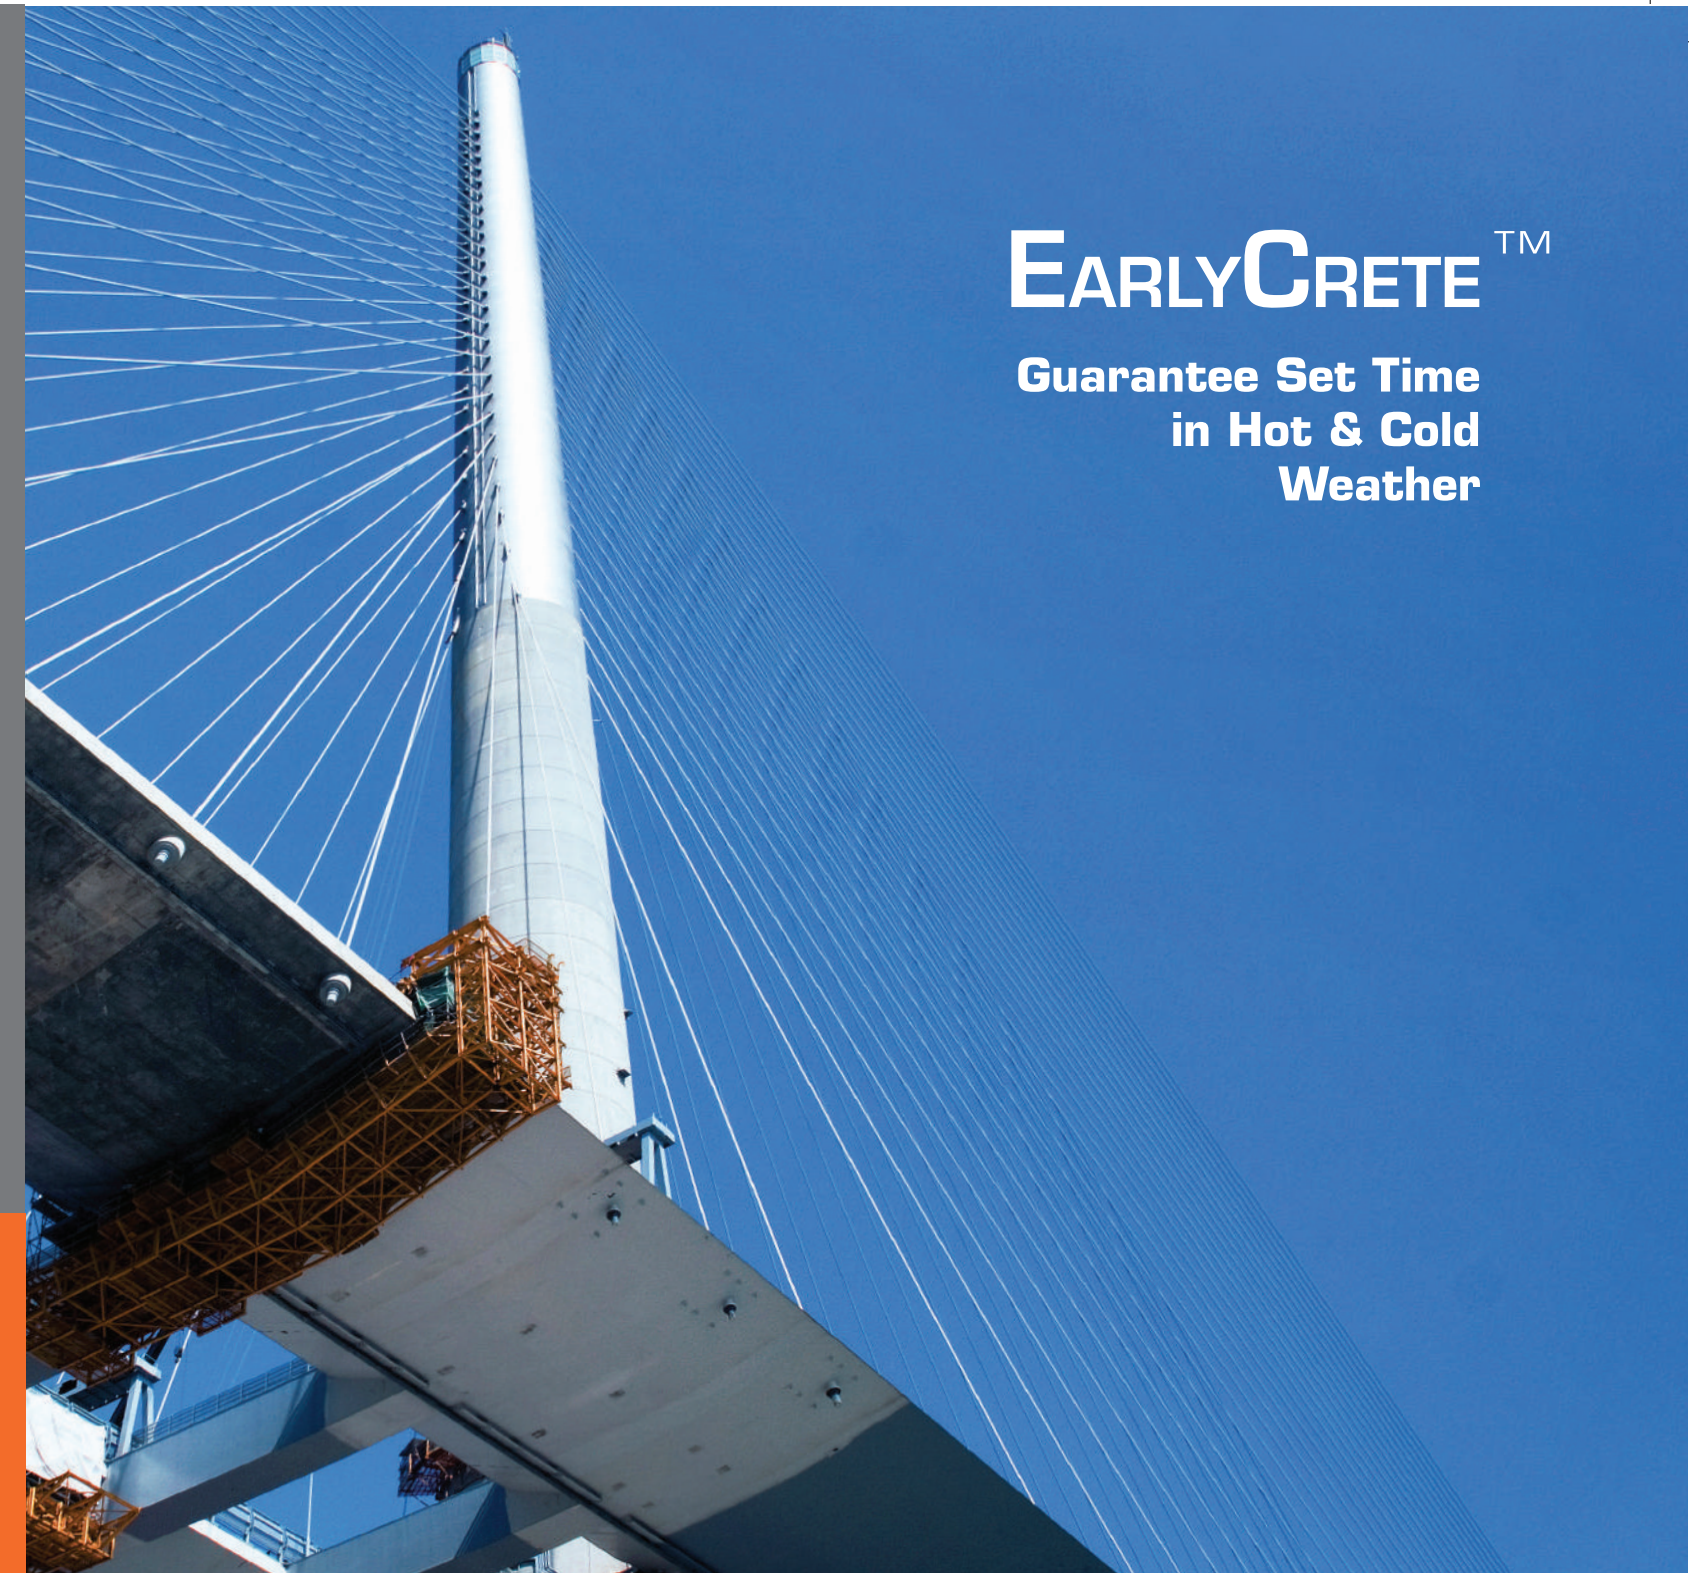

- Water treatment works
- Sea walls and pier repair

EarlyCrete™ makes itself the best products when in-situ concrete is required for a highly abrasive environment.

- Industrial factory flooring
- Bridge strengthening

In an aggressive environment, EarlyCrete™'s unparalleled performance in durability and resilience that result in minimal maintenance speak for itself.

Full customer satisfaction*

For every unique application

for today's challenging applications

Anderson Concrete is the largest producer of ready-mixed concrete in Hong Kong. With our long established company history, strong partnership with our shareholders & suppliers and close working relationship with our customers, we served the largest and most complex construction projects and crafted numerous project legacies in Hong Kong.

We own a network of strategically located concrete plants and operate the largest fleet of eight cubic meter mixer trucks which offer you the strongest production capacity and competitive edges in logistics and concreting time control that assure you smooth concrete supply to meet your concrete needs.

Being the pioneer of ready-mixed concrete in Hong Kong, we continue striving for new ideas, materials and technology to cater for the ever changing construction market and challenging projects. In addition to the standard concrete products, we offer a wide range of premium concrete products to meet the specific requirements of our customers.

For the most demanding projects, sometimes under challenging conditions, you will require a concrete product that delivers the highest performance in early concrete strength and setting time: - Roads can only be closed for a number of hours before they have to be opened to rush hour traffic the next morning. Port terminals cannot be closed for too long before operational efficiency is compromised.

Repair jobs may sound easy but they are not. For these jobs, you need quality concrete that sets quickly and achieves strength fast. That's why so many contractors are turning to Anderson's EarlyCrete™

EarlyCrete™ can achieve minimum of 20MPa in 12 hours, is fast and easy to place, and produces superior finishing and durable, good quality concrete. You have the assurance of finishing the job on time, with no worries of callbacks.

EarlyCrete™ comes in three formulations to meet your specific requirements. If the following formulations do not meet your requirements, talk to us and we will custom-design and deliver to meet your exact specifications.

EarlyCrete™ Family				Custom
	Regular	Premium	Super	
Minimum strength of 20MPa in 12 Hours	✓	✓	✓	We can custom make to suit your setting time and strength requirements
Fibre reinforced for crack minimization		✓	✓	
Rapid setting for super early strength			✓
