

# AT ANDERSON CONCRETE

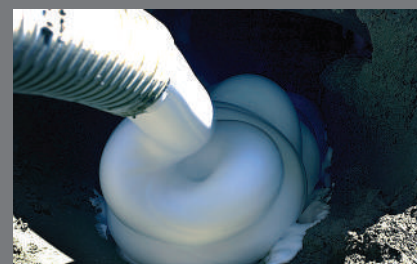

*your satisfaction  
is our success*

For more than 40 years, we have been working with the local construction industry to build Hong Kong. FoamCrete™ is another specialty product proudly presented by Anderson Concrete to meet the increasingly stringent construction requirements. With each load of FoamCrete™, we deliver good quality and top service to ensure your satisfaction. We value your business; therefore we make sure that you get value from your business with us.

We offer comprehensive range of specially formulated products. To meet your specific needs, simply call our experts to discuss and evaluate your project need and we will offer our solutions.

## 8 GOOD REASONS choosing **FOAMCRETE™** to your project

### Light weight

FoamCrete™ is lighter than normal concrete by up to 75%, thus reducing the loading burden and does not impose a lateral load to the structure or structural element

### Free flowing

The free flowing characteristic of FoamCrete™ allows it to reach the most inaccessible locations while minimizes the need for horizontal pumping, thus saving pumping cost

### No compaction necessary

No compaction or vibration is necessary to save handling and labour costs

### Thermal and Sound Insulation

FoamCrete™ is of low thermal conductivity (5-20% of normal concrete), therefore providing an excellent insulation to heat. Also, FoamCrete™ is a good sound insulator.

### Ease of handling and placing

FoamCrete™ is delivered ready-mixed, which is easy to handle and place.

### Stability

With Anderson Concrete's quality control and proven experience in concrete production, FoamCrete™ is more stable than site-mixed foam concrete

### Wide Range of Mixes

Adjustable to meet specific performance requirements. Control density and strength

### No Segregation

Segregation is avoided with the stabilizing effect of the foam entrained

## FOAMCRETE™

**Your Superior  
Aerated Lightweight  
Concrete Solution**

A Finely graded low density foamed mortar

# ANDERSON Concrete

# CHOOSING FoAMCRETE™

# SUPERIOR **excellence lightweight concrete product** Dedicated to satisfying all your individual needs at various applications

commitment of superior quality & professional service for more than 40 years

*Enviably reputation;  
Full customer satisfaction*

*for today's challenging applications*

**FoAMCRETE™** being incredibly versatile, is available in a wide range of fresh wet density and compressive strength to match your unique requirements and applications - from fresh wet densities of 800kg/m3 to 1,800kg/m3 achieving compressive strengths of 1N/mm2 to 10N/mm2.

Anderson Concrete is the largest producer of ready-mixed concrete in Hong Kong. With our long established company history, strong partnership with our shareholders & suppliers and close working relationship with our customers, we served the largest and most complex construction projects and crafted numerous project legacies in Hong Kong.

We own a network of strategically located concrete plants and operate the largest fleet of eight cubic meter mixer trucks which offer you the strongest production capacity and competitive edges in logistics and concreting time control that assure you smooth concrete supply to meet your concrete needs.

Being the pioneer of ready-mixed concrete in Hong Kong, we continue striving for new ideas, materials and technology to cater for the ever changing construction market and challenging projects. In addition to the standard concrete products, we offer a wide range of premium concrete products to meet the specific requirements of our customers.

**FoAMCRETE™** one of Anderson Concrete's trademarked product, is a cement-bonded material made by blending of exceptionally fluid foam with cement slurry

**FoAMCRETE™** having the low density self-leveling properties make itself an ideal backfill material that effectively eliminate the difficult engineering issues

This aerated lightweight concrete is ready-mixed and deliver to your site. This achieves cost savings by removing the need for mixing onsite.

## Applications

- Infill void, cavity and culverts -**  
you can be rest for sure that it will fully fills the void - crucial in terms of speed and safety
- Backfill abandoned sewers, pipe lines -**  
it will fill a trench completely to create absolute stability
- Makeup levels of floor Insulation of roofing -**  
it will flow quickly to form a wearing course to protect the structure
- Precast lightweight blocks -**  
this offers you an effective solution in making precast blocks

Anderson Concrete's FoamCrete™ is your lightweight solution. Being free-flowing and self-leveling, you can save a considerable amount of time and expense of labour and plant in completing your jobs.
